PROJECTS

FundWise
Banking Management System
Jul 2023 – Aug 2023
The banking management system is a web application developed using Java, Spring Boot, HTML, CSS, JavaScript, and React. It is designed to provide a comprehensive solution for managing various banking operations and processes.

Design and Manufacturing of Rotary Storage System
2019 – 2020
Presenting a Rotary Storage System (RSS) for streamlined material handling. This system employs rotating compartments to enhance space utilization and accessibility. Manufactured with durable materials, RSS optimizes storage efficiency and ease of access.

Hydraulic Ram Pump
Nov 2016 – Mar 2017
The hydraulic ram pump is an automated device harnessing flowing water's energy from springs, streams, or rivers to pump water to elevated locations. This technology facilitates water transfer to higher points than the source, offering an efficient water lifting solution.
